Dear Sirs,

Marine Service Jaroszewicz Wiesław Company offers services in foundation of engines and machinery on foundation chocks cast in: **EPY** compound (quite our own production), **Chockfast** (producer - ITW Philadelphia Resins) and **Epocast** (producer - H.A. Springer marine + industrie service GmbH).

We are in possession of all certificates which to be required in foundation of marine engines and machinery. We are the holder of the Technical Approvals of the Research Institute of Roads and Bridges and Institute of Construction Engineering which meet requirements of foundation the land objects as well. Moreover we have obtained the Permission of the Polish Mining House which allows us to seat machinery in plants of mining industry.

We can present to our Clients the long list of foundation references: we have seated more than **9500 objects** including over **1900 marine main propulsion engines**. We are the Company with **35-years** of experience in foundation of machinery.

We perform production of EPY compound and foundation of engines and machinery on chocks cast according to the procedures of the Quality Management System in accordance with DIN EN ISO 9001:2000 standards, certified by the Germanischer Lloyd Certification and Russian Marine Shipping Registry.

We perform:

- design of foundation of engines and machinery
- approval of documentation in classification societies
- delivery of following materials: EPY, Chockfast, Epocast
- delivery of auxiliary materials
- font moulds to cast of foundation chocks
- casting and cure of chocks and fitted bolts of cast-in-epoxy resin
- bracing of bolts in concrete foundations
- removal of moulds' elements, cosmetics operation.

Utilization of our offer allows:

- to eliminate machining of foundation and bed plate
- to avoid of manual matching of chocks
- to decrease of vibrations and noise level
- to set-up of machinery in stable and durable way
- to put machinery into operating in short time

Yours faithfully,

Wiesław Jaroszewicz
